Managed Online Backup

Any information that is critical to you should be backed up, and one of the simplest ways to do that is through an online ("cloud") solution. We offer a completely Managed Online Backup, which gives you the peace of mind of knowing that we are making sure everything is running successfully.

Managed by us

MANAGED BACKUPS SO THAT YOU KNOW THEY ARE WORKING

While there are other free solutions (e.g. iCloud, DropBox), the amount of storage with free accounts, is usually very limited. Also no-one is checking to make sure the backups are working. If we notice that backups haven't run for some time, we will contact you.

Multiple versions

By default, backups will run every day and be kept for 28 days. But we can also add on monthly archiving if you need to go back further.

Our solution includes the ability to restore entire folders to a point in time. Imagine the scenario where all the files on your computer become corrupted, either through a hardware fault or a virus. With a standard cloud storage product, these corrupt files would be

28 DAYS OF BACKUPS PLUS MONTHLY ARCHIVES

copied to the online storage. And if you wanted to restore the files to a previous, clean version, you would need to restore each file individually (this could be 100's of files). But with Managed Online Backup, we can restore entire folders.

Most efficient use of internet connection

Our software has a lot of smarts built in, including compression and deduplication, to minimize the data that needs to be sent over the internet. And after the initial first backup runs (where the entire selection is copied up online), only the data that changes will be sent. This goes right down to the smallest parts of individual files, not the entire files.

Security matters

All data is encrypted, both during transmission and while stored online. So no third party is able to access your files.

All backups are stored in Australasian data centres with 99.999% uptime guarantees.

Pricing Plans

5GB selected data*	$5.90 per month
10GB selected data*	$10.90 per month
15GB selected data*	$15.90 per month
Unlimited data	$20.90 per month

* can be shared amongst multiple computers

NOTE: Standard labour charges apply for installation, configuration and restores
